

Digital Portfolio

STUDENT NAME: R.Jagadeeswaran

REGISTER NO:32724U18032

NMID:astvu32724019

DEPARTMENT: Bsc.Computer science

COLLEGE: SSS ARTS AND SCIENCE

COLLEGE/THIRUVALLUR UNIVERSITY

PROJECT TITLE

digital portfolio using HTML, css,
JavaScript

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

- In today's digital-first world, individuals often struggle to present their skills, achievements, and creative work in a structured and accessible way.
- Traditional resumes, paper portfolios, or static documents fail to showcase interactive projects, design aesthetics, and multimedia elements effectively.
- This creates a gap between talent and opportunities, as employers, clients, or audiences find it difficult to evaluate the complete potential of an individual.
- A digital portfolio solves this problem by providing a dynamic, user-friendly platform where a person can highlight their skills, experiences, and projects in an engaging and professional manner.

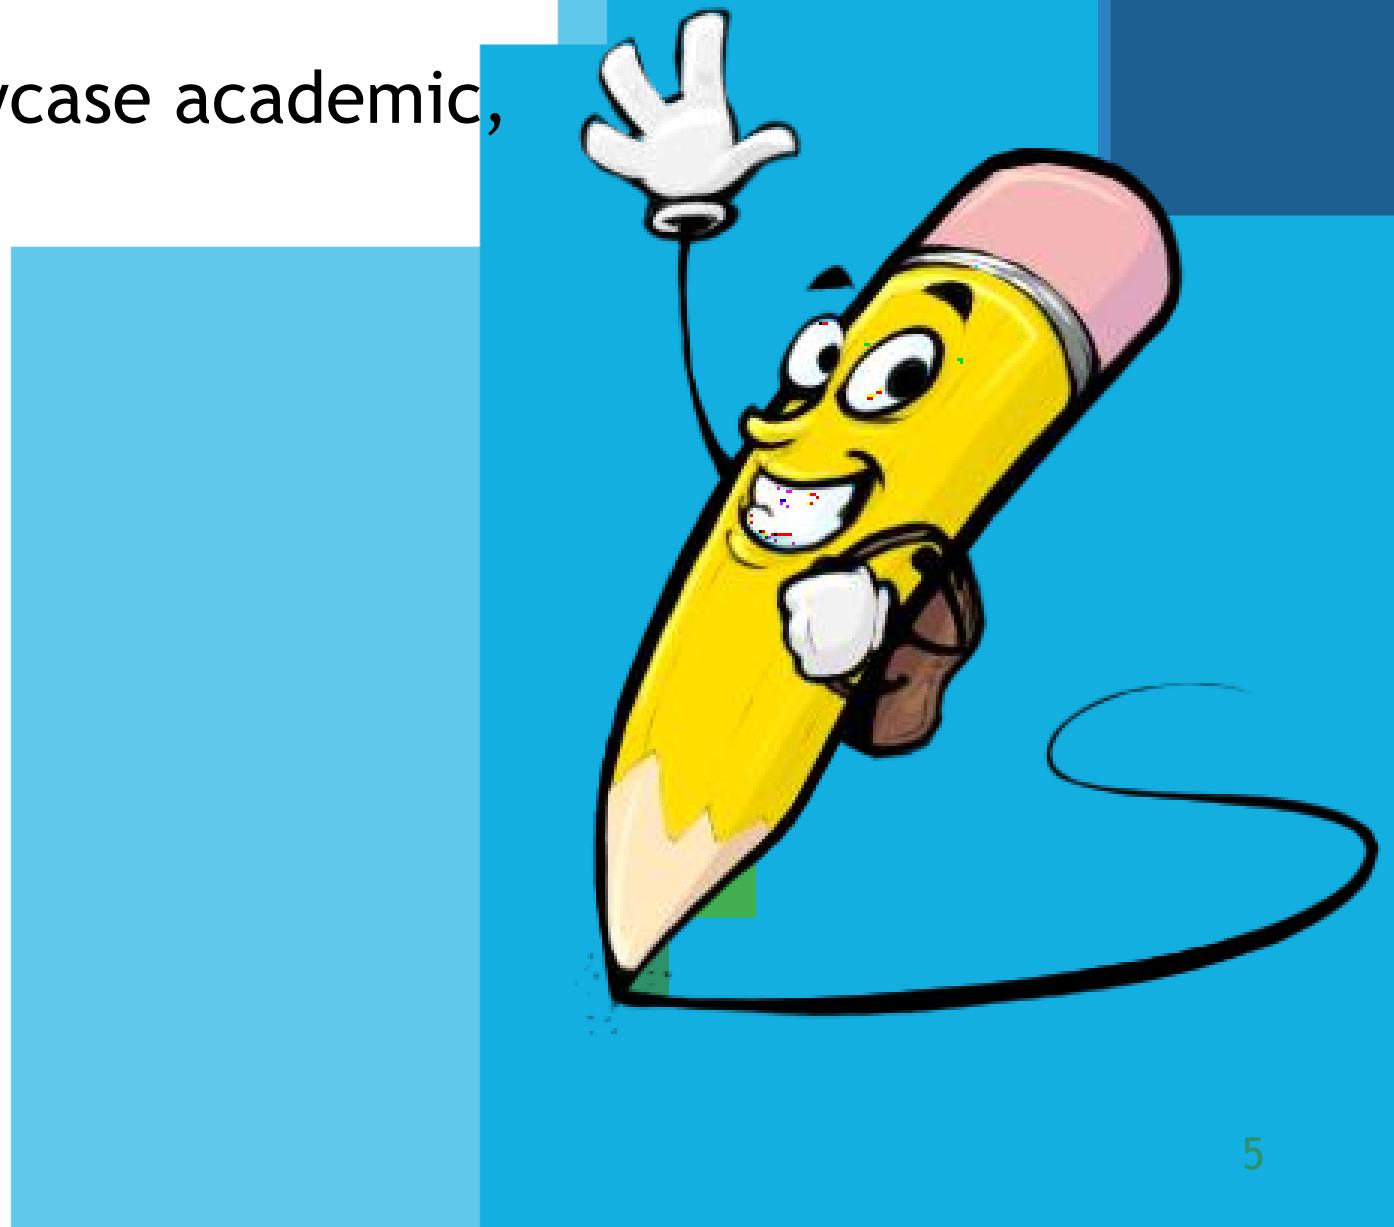

However, creating such a portfolio often faces challenges like: Lack of technical knowledge to design and develop one. Difficulty in organizing and curating content to reflect true strengths. Limited accessibility and poor compatibility across devices. Absence of personalization that differentiates the individual from others.

PROJECT OVERVIEW

The goal of this project is to create a professional, visually appealing, and interactive digital portfolio that highlights personal skills, achievements, and creative work.

- It serves as both a self-promotion tool and a platform to showcase academic, professional, and personal projects.

WHO ARE THE END USERS?

To showcase skills, projects, and achievements.

To highlight work samples, case studies, and career growth. To track teaching methods, lesson plans, and achievements. To present services, products, and success stories. End users: Recruiters, HR managers, admission committees, teachers, or internship providers. Clients, employers, collaborators, or agencies. School administrators, students, parents, or education boards. Customers, investors, business partners.

TOOLS AND TECHNIQUES

1. Responsive Design

Tools (on Mobile with CodePen)

1. CodePen App / Mobile Browser

Use codepen.io on Chrome or Safari.

Login to save and edit your portfolio.

Use @media queries so your portfolio looks good on mobile & desktop.

2. HTML (Structure)

For content like your name, about section, skills, projects, contact details.

3. Sections

Header - Name & tagline.

About Me - Short bio with photo.

Skills - List with icons or progress bars.

Projects - Grid or card layout with images/links.

Contact - Email or form.

4. JavaScript (Interactivity)

Add animations, sliders, form validation, or project filters.

4. Animations

CSS transitions (:hover) or small JavaScript scroll effects.

5. External Libraries/Frameworks (Optional)

Bootstrap / TailwindCSS - for responsive design quickly.

FontAwesome - for icons.

Google Fonts - for stylish text.

Example: fade-in sections while scrolling.

5. CodePen Embeds

If you build mini projects in CodePen, you can embed them inside your portfolio.

POTFOLIO DESIGN AND LAYOUT

FEATURES AND FUNCTIONALITY

Features of a Digital Portfolio

1. Personal Branding

Name, tagline, professional role, and profile photo.

A personal logo or unique color theme.

2. About Section

Short bio or career summary.

Background, education, and interests.

3. Skills Showcase

Technical and soft skills (with icons, progress bars, or charts).

Categorized (e.g., Web Development, Design, Tools).

1. Interactive Animations

Smooth scroll to sections.

Fade-in or slide-up animations when scrolling.

2. Search or Filter Projects

Filter projects by category (e.g., Web, Mobile, Design).

3. Embedded Media

CodePen, GitHub repos, YouTube videos, or Behance designs.

4. Theme Toggle

Dark mode / light mode switch.

5. Analytics (Optional)

Google Analytics to track views.

Achievements & Certificates

Personality Development Certificate
In recognition of the commitment to achieve professional excellence

Jagadeeswaran R
Has successfully satisfied the requirements for:
Web Development Fundamentals

Issued on: Jul 20, 2025
Issued by: IBM SkillsBuild
View: <https://credy.credly.com/badge/f105097677341e8124a05031479ac>

Awarded by HR Sir for outstanding participation in Personality Development workshop.

Soft Skills **Workshop**

IBM skills WEB Development
IBM SkillsBuild Completion Certificate

This certificate is presented to **Jagadeeswaran R** for the completion of
Edunet- Front End Web Development
(PLAN-741582ED6C44)
According to the Your Learning Builder - Plans system of record

Completion date: 13 Aug 2025 (GMT)
Completed online course covering Edunet- Front End Web Development

WEB Development **Certification 1**

CONCLUSION

The Employee Salary Prediction System successfully demonstrates the end-to-end application of machine learning in solving a real-world HR analytics challenge. By simulating realistic salary data and applying advanced modeling techniques, the system achieved high prediction accuracy and practical insights into salary dynamics.

The use of SHAP for model explainability added transparency, enabling users to understand key salary drivers. The Streamlit-based deployment ensured accessibility through a user-friendly web interface.

This project highlights the effectiveness of combining data science, domain knowledge, and cloud deployment to deliver a scalable, production-ready solution for compensation intelligence.
